Live demo checklist: stackable restaurant filter

Live page: https://uber-eats-filter-e6lw.vercel.app/ **Deployed commit checked:** a5531b2 (Next.js 15.5.28). The page footer prints the commit Vercel built it from (`Build: a5531b2`, read from `VERCEL_GIT_COMMIT_SHA`), and that footer is visible in every screenshot below. Later commits that only change `checks/`, `docs/` or the README are skipped by Vercel (`vercel.json`), so the live page stays on this commit. **How the screenshots were taken:** `scripts/live-check.js` opens the live URL in a brand-new Microsoft Edge browser context (no cookies, not signed in to anything, the same as a private window), taps each stack's chips, reads the count and every restaurant name, and saves a full-page screenshot plus `live-results.json`. Re-run it with `node scripts/live-check.js https://uber-eats-filter-e6lw.vercel.app/ docs/live`. **How each row was checked:** clear all filters, tap the listed chips, then read the result count and every restaurant name on screen, and compare both with the expected-results table. No row needed a page reload; the list and count changed on each tap.

First load

Check	Result
Opens with no login, account or gate	Yes. The link loads straight to the restaurant list (HTTP 200, no redirect, no password field).
Which build is live	Footer reads **Build: a5531b2**.
Shows every sample restaurant	Yes. **40 of 40 restaurants**, 40 cards on screen. (screenshot)
Data source	`data/restaurants.csv`, committed in this repository and read at build time. Nothing is fetched from the web.
Type safety	Production build passes with 0 TypeScript errors; the code has no type-check escape hatches.

One row per stack

#	Active filters	Expected count	Live count	Names match the table?	Notes	Screenshot
1	Vegetarian + 30 min or less + $ + $$	9	9	Yes, all 9 in data order	**Olive & Ember Mezze** (exactly 30 min) is on the list, as the "30 min or less" chip promises.	live-check-1
2	Vegetarian + 30 min or less + $ + $$ + 4.0+	8	8	Yes, all 8	**Leafline Salad Co.** and **Olive & Ember Mezze** (exactly 4.0) stay; Mumbai Express Kitchen (3.9) drops out.	live-check-2
3	Vegetarian + 30 min or less	11	11	Yes, all 11	Row 1 with price dropped: the count went up (9 to 11), never down.	live-check-3
4	20 min or less + $ + 4.5+	0 (none)	0	Yes, no cards shown	The written message appears instead of a blank space: "No restaurants match 20 min or less, $ and 4.5+ right now." **Clear all** then brings back **all 40**.	message, after Clear all
Extra	Vegetarian + Gluten-free	7	7	Yes, all 7	Both dietary tags must be yes: Slice & Fire Pizza (vegetarian only) is correctly left out.	live-check-5

Result: every stack passed on the live page, with counts and names matching the table, and no Apply button or reload. Open data question still with the data owner: three restaurants are marked vegan but not vegetarian; the filter follows the data as written.

Script output (live-results.json)

URL: https://uber-eats-filter-e6lw.vercel.app/ **HTTP:** 200 **Footer:** Build: a5531b2 **First load:** 40 of 40 restaurants (40 cards) **Password fields:** 0 **Page reloads during clicks:** 0

Stack	Chips	Expected	Live	Names match	After Clear all
check-1	Vegetarian + 30 min or less + $ + $$	9	9	Yes	
check-2	Vegetarian + 30 min or less + $ + $$ + 4.0+	8	8	Yes	
check-3	Vegetarian + 30 min or less	11	11	Yes	
check-4	20 min or less + 4.5+ + $	0	0	Yes	40
check-5-two-chips	Vegetarian + Gluten-free	7	7	Yes
